The world calls AI a risk.

Misinformation & Disinformation: the #1 technological risk in the WEF Global Risks Report 2025.

7%

picked it as the risk most likely to cause a global crisis.

The claim is not supported by evidence. There is no confirmation from Lionel Messi, the Leo Messi Foundation, ESPN Argentina, or any major news outlet that the foundation donated over \$2.3 million for Nepal’s August 2026 floods. The graphic citing ESPN Argentina does not match any published article from that outlet.

GOAT on and off the field 🐐 🙏

Real example: a viral “Messi donated \$2.3M to Nepal” post — fact-checked and debunked. **Fast, verified information is the antidote.**

Then came the flood. So I built this — in one day.

And the mindset behind it →

The leadership skill that matters now is a mindset.

अबको नेतृत्व सीप भनेको मानसिकता हो ।

High agency

उच्च आत्मशक्ति: “म गर्न सक्छु ।”

“I can do this.”

Sense of urgency

तत्कालता: “अहिले नै हुनुपर्छ ।”

“It has to be now.”

Bias to action

कर्मप्रति झुकाव, “अहिले सुरु, पछि सुधार ।”

“Start now, fix later.”

High agency = clear thinking + bias to action + disagreeability. — George Mack, highagency.com

“

**You don't need mentors,
you need action.**

तपाईंलाई मेन्टर होइन, कर्म चाहिन्छ ।
